Back Peel plus Light	\$195	\$935

A newer approach to tackle the signs of ageing and problematic skin conditions, without the downtime of traditional peels. The special lactic acid formula reaches deep into the skin whilst preserving the skin's architecture. This helps keep the skin cooler and more comfortable throughout the treatment process. With a combination of different strengths and a 3-layer technique, each subsequent treatment application can build-up the percentage of lactic acid applied. The result is a highly effective peel system to achieve healthier skin, for a wide range of skin conditions, with less redness and downtime.

A course of 6 treatments is recommended, at weekly intervals.

The procedure is completed with an inclusive application of da Vinci™ growth factor, which speeds up the healing rate and supports and optimises the skin rejuvenation process. Topical local anesthetic can be used to minimise any discomfort.
